

QUESTIONNAIRE for your bathroom

Dear customer,

in this questionnaire we ask you to look detailed into your wishes for your new bathroom. If you've been already in an individual consultation or in a showroom you already have dealt with most issues. If not this questionnaire asks you the right questions. Keep in mind that also a good advisory consultation is not completed in 30 minutes.

Chapters A + B (page 2-3) ask general questions to you as a client and users of the bathroom as well as for the spatial requirements to the new bathroom.

In Chapter C + D (page 4-8), we show you some photos to rate and ask you some style questions to find out more about desired atmosphere in your new bathroom. Should it be, for example, rather cool and hygienic, or have a more warm and homely character. Would you like a minimalist design, a country-style or maybe even a Caribbean -style bathroom?

The bathroom configuration questions in Chapter E (page 9-14) evaluates your preferred bathroom objects, accessories as well as the wall, floor and ceiling designs. Note that you always can leave it open for the planners choice. Therefore we recommend you to tell us what really is important for you in your bathroom and leave the other issues to be chosen with the expertise and diverse product knowledge of the planner.

Finally Chapter F (page 14) asks you about lighting and heating.

Thank you for your time and help on the way to your new bathroom.

Thomas Lammering
